comdico@gmail.com

Hello, my name is David Comdico and for the past 7 years I have built hundreds of websites for non-profit organizations of various sizes. As a User Experience Designer I wear many hats and have lead and overseen each aspect of the web development process. One day I might be on-site capturing requirements, while the next fine-tuning web copy. My expertise is wide-reaching and I love applying myself to each aspect of the process.

Work Experience

Association Headquarters
(July 2006 - Present)

Director of Web Services

Managed, and mentored, a team of 8 members comprising developers, designers, and a Project Manager.

Performed on-site discovery, requirements gathering, and research with volunteer leaders, including C Level executives

Implemented and managed a Project Management system in Atlassian Jira and a corporate wiki on Atlassian Confluence.

Produced wireframes and User Experience documents for major website redesigns.

Managed and architected a CMS solution for an enterprise level CRM system using Drupal.

Developed various business solutions for diverse in-house client-base, including a Responsive web application for annual events.

Continually improved internal team systems and toolsets to be more agile and modular.

Led internal training seminars and served as featured speaker at Industry meet-ups and conferences.
