

David Comdico

UX, Design & Creative Direction

267 847 3164

comdico@gmail.com

Hello, my name is David Comdico and for the past 9 years I have built hundreds of websites for organizations of various sizes. As a project lead I wear many hats and have participated in, and managed, each phase of the web development process. My expertise is wide-reaching and I love applying myself, and continually improving, the skillsets and processes needed for successful web development.

Work Experience

Promet Source

(July 2014 - Present)

Project Manager

Responsible for overall project delivery, managing projects using Agile in Jira.

Storymaps of project flow with clients to develop spine of website.

Lead on UX and front end architecture.

Developed designs and layouts from provided theme or Style Tile.

Began implementation of company-wide Styleguide-driven development process.

Association Headquarters

(July 2006 - 2014)

Director of Web Services

Produced wireframes and User Experience documents for major website redesigns.

Managed and architected a CMS solution for an enterprise level CRM system using Drupal.

Developed various business solutions for diverse in-house client-base, including a Responsive web application for annual events.

Continually improved internal systems and tools to be more agile and modular.
